

Memory (2 Player)

Overview:

To play the memory game, player is presented with a grid of blank tiles, then players take turns “flipping” two tiles, “keeping” them if they match, and taking another turn, but they turn back over if they don't match. Play continues until all pairs are matched, and the player with the most pairs at the end wins.

Gameplay

On your turn, click on 2 cells to reveal their picture.

If they are a match: You keep the pair and take another turn.

If they are not a match: they will go back to being blank tiles in their original spots. Your turn is over, and the next player goes.

Winning the Game

The game ends when all pairs have been correctly guessed.

The player with the most matching pairs at the end of the game wins.
